. about CarmoFarm

With decades of experience in the timber industry, **CarmoFarm** is a leading company in the production, processing, treatment and valorisation of this natural resource.

Our work is built on a combination of tradition, innovation and sustainability — developing solutions that address today's needs while anticipating the challenges ahead.

Guided by our commitment to **quality wooden solutions built for agricultural performance**, we offer integrated technical systems designed to modernise and protect agricultural operations, ensuring longevity, productivity and environmental responsibility. Whether establishing a new vineyard, supporting an olive grove, protecting an orchard or fencing an agricultural property, we provide reliable products adapted to every requirement.

Wood we are.

. business areas

VINEYARDS

Specialists in support and protection systems for vineyards, offering comprehensive and long-lasting solutions that ensure growth and productivity.

OLIVE GROVES

We offer a comprehensive range of solutions for olive cultivation, from planting stakes to complete support structures designed to ensure the healthy and productive development of your trees.

FRUIT GROWING

We offer various solutions for fruit growing, from planting stakes and full trellising systems to crop protection structures.

FENCING

Fencing is an essential element in the management of agricultural, forestry, industrial and environmentally protected land. We supply posts, netting and all accessories required for installation — and offer a full in-house installation service.

WOODEN POSTS

CarmoFarm's treated wooden posts combine durability and strength, making them a reliable solution for agricultural support. Produced from **high-quality** raw material, they ensure **high mechanical strength**; innovative techniques, combined with Class 4SP autoclave treatment and rigorous quality controls, allow us to offer a **guarantee of up to 20 years** — a commitment to excellence recognized both nationally and internationally.

METAL POSTS

CarmoFarm's metal posts were designed to meet the demands of agricultural support structures such as vineyards, olive groves and orchards, combining **functionality with high strength**. Made from structural steel, they ensure mechanical robustness, flexibility essential for agricultural use, and excellent performance against lateral winds, with fewer breakages during installation and a competitive price. **This commitment reflects our dedication to offering effective solutions adapted to every farming operation.**

Treated wood products eligible for FSC® and PEFC certification

■ TRELLISING SYSTEMS, ACCESSORIES AND NETS

We specialize in trellising systems, offering long-lasting solutions that optimize any type of agricultural operation. We use high-quality materials, triple-galvanized wire and various tensioning accessories from our partners Gripple, Helios, as well as Fenox solutions, which ensure precision, safety and efficiency during installation. With experienced teams and technical support at every stage, we ensure solid, reliable structures, essential for the growth and productivity of your crops.

PLANTING STAKES & MACHINE ROUNDED POSTS

Our planting stakes are specially designed for young trees, adapting to different types of planting, pointed and various sizes to meet each need. Made from maritime pine and treated in **Class 4SP autoclave**, they offer **high mechanical strength** and **exceptional durability**. CarmoFarm's machine rounded treated wood posts are cylindrical, smooth-surfaced, with uniform dimensions, high durability, and a **guarantee of up to 20 years** against premature rot.

CROP PROTECTION SYSTEMS (TECHNICAL NETTING)

At CarmoFarm we offer complete agricultural protection solutions, such as anti-hail, anti-rain, sun-control, and anti-bird netting, developed to meet the challenges of climate change and guarantee the safety of your harvest.

With high-quality materials, leading accessories and experienced teams, **we ensure durable, effective systems** to protect your crops even under the most demanding conditions.

WOOD SHAVINGS

CarmoFarm wood shavings are produced from **100% maritime pine**, as wide-blade fine shavings (international competition format), of regular size and dust-free thanks to double sieving. They undergo closed-circuit drying, resulting in shavings that are perfectly dry, highly voluminous, and with **high absorption capacity**. They have a golden light-yellow color, retain the natural scent of pine, and are packed in 600L bags.

UTILITY POLES

At CarmoFarm we produce treated wood poles for overhead line installation, ensuring strength, **durability and reliability**. Made from autoclave-treated pine and compliant with the EN 14229 standard, our poles hold internationally recognized quality certifications such as CE marking, CTBB+, and ISO 9001 SGS ICS.
