. olive growing

At the heart of olive growing is **commitment** and **attention to each olive tree**, and through our **stakes**, we provide the right support for robust, **healthy growth**. Choosing CarmoFarm solutions means prioritizing excellence and longevity, ensuring an abundant harvest and balanced production.

. products

WOODEN POLES

At CarmoFarm, we offer a warranty of up to **20 years against wood rot**, attesting to the effectiveness of our treatment and the quality of the wood we select.

Stakes: Available in multiple sizes, with square or round cross sections, to suit different planting requirements. Suitable for staking trees in orchards and olive groves, from initial planting through to mature cultivation. In olive growing, staking young trees ensures healthy vertical growth.

Conical Posts: Head posts from 1,40 to 2 meters long, with typical diameters of 6 to 10cm, to support the trellising; and intermediate posts from 1,40 to 1,80 meters long, with typical diameters of 5 to 8cm.

Treated wood products eligible for FSC® and PEFC certification

METAL POSTS

Steel posts are manufactured from **S250GD galvanised steel sheet (Sendzimir and Magnelis)** and S355 **Corten** steel. They combine **mechanical strength with flexibility**, reducing breakage during installation and operation. They offer **high resistance to wind and external loads**, ensuring structural stability over time.

GRIPPLE

Gripple's products are the benchmark for installing, tensioning and maintaining trellising systems, offering unique technical features such as: Simultaneous connection and tensioning: eliminates the traditional method of tying wire by hand, enabling fast installation and a professional finish.

Simple, cost-effective repairs: with just one GP FIX unit, you can repair an entire wire section.

Multi-wire compatibility: compatible with conventional or high-tensile wires of various diameters

Simple and cost-effective repairs: with just two devices like the Gripple Plus, you can repair an entire section of wire.

- GP No. 1 & GP No. 2
- Gripple Small
- Gripple Medium
- Gripple Large
- Gripple Jumbo
- GP FIX
- GPAK W & M
- Apex Anchors

WIRE & OTHER ACCESSORIES

Selecting the right wire and accessories is essential for effective canopy management and minimising the impact of machinery during mechanical harvesting. CarmoFarm offers a wide range of wires and accessories for professional joining and tensioning, including components designed to simplify installation and maintenance and to withstand weathering and mechanical stress, and can advise on the right choice for your project.

Klasse Carmo Wire (triple galvanization) + **Crapal** (zinc/aluminum): hard, high carbon-steel wire with low elongation, typically used in demanding applications.

From **Fenox**, we offer a complete range of metal accessories for your olive grove, like metal clips and anchors.
